

AqBanking - Bug #232

gwenhywfar fails to compile out-of-tree

02/18/2021 10:26 PM - wrobelda

Status:	Closed	Start date:	02/18/2021
Priority:	Normal	Due date:	
Category:			
Betriebssystem:	MacOSX	Anwendung:	KMyMoney
AqBanking-Version:	5.5.1	Version der Anwendung:	

Description

The compilation fails when building out-of-tree, i.e. in a folder that is not relative to the current sources.

This was fixed upstream in ax_have_qt.m4 with

<http://git.savannah.gnu.org/gitweb/?p=autoconf-archive.git;a=commitdiff;h=b15e688294b3be8481e477b16b52c7f81bc7eb58#patch1>

The attached patch incorporates the upstream fix, while preserving previous custom changes (11b63e8a7e5f2dc949de3bec0983de0e0255c75b) to gwenhywfar's copy

Date: Sat Feb 20 08:36:46 2021 +0100

Fix out of tree builds

This updates the ax_have_qt.m4 to the current upstream version, which includes a fix (b15e688294b3be8481e477b16b52c7f81bc7eb58) for a bug causing issue with building in a directory relative to the current one.

Fixes <https://www.aquamaniac.de/rdm/issues/232>
