

AqBanking - Bug #240

Backport commit "GUI: Remove bad pin also from password cache." to maint branch

09/07/2021 01:32 PM - rhabacker

Status:	Closed	Start date:	09/07/2021
Priority:	Normal	Due date:	
Category:		Anwendung:	KMyMoney
Betriebssystem:	FreeBSD, Linux, MacOSX, Windows	Version der Anwendung:	
AqBanking-Version:	6.2.10		

Description

It was announced on https://bugs.kde.org/show_bug.cgi?id=384051 that a fix for the mentioned problem has been applied (<https://www.aquamaniac.de/rdm/projects/gwenhywfar/repository/revisions/f0c8a65ada0b8387199b028a117df42a1f9ab468>). To have this in the next stable release, this commit needs to be applied to the 'maint' branch, I think.

History

#1 - 09/11/2021 02:27 PM - martin

- Status changed from New to Closed

The "maint" branch always contains the latest released version.

Just prior releasing a new version the releasable state of "master" is merged into "maint" and from there packages are made.

Consequently, "maint" now contains the latest release which also includes the changes removing bad pins from short-term cache.
