Beschreibung

When I try to make a sepa transfer with aqbanking-cli for BW-Bank Stuttgart (BLZ 60050101), it says "VOP not available" after I entered the PIN.

- aqbanking-20251006-1-vop
- libgwenhywfar-5.13.0 on Ubuntu Noble
- "7923 (F923/V7/P2): pushTAN-cas (pushTAN 2.0) ZKA-ID=Decoupled"

Console output:

```

```

Do I interpret that right - this means:
VOP does not work because of missing definition for HIVPPS version 0 in /usr/share/aqbanking/backends/aqhbci/hbci.xml ?
Or does it have another cause?
