Beschreibung

Because it uses the not-yet-standard C function `strndup` that's not supported in msvcrt.

As a workaround we've patched it with

<https://github.com/Gnucash/gnucash-on-windows/blob/master/patches/aqbanking-5.99-strndup.patch> that naively copies the `my_strndup` static function from swift.c, but that's probably not what you'd want as an actual fix.

Thanks, but I fixed it by adding a function GWEN_Text_strndup() which is now used in Gwen. Needs latest Gwen.
